### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Kevin Spivak on 12/10/08.

The application has been amended as follows:

- a. In claim 1, line 11, "said interference signals" has been changed to --said generated interference signals--.
- b. In claim 7, line 10, "said estimated interference signals" has been changed to --said generated interference signals--.
- c. In claim 11, line 11, "said estimated interference signals" has been changed to --said generated interference signals--.

### ***Drawings***

2. Applicant is asked to resubmit the drawings filed with the amendment on 9/12/08 as not all of the replacement sheets were correctly received.

### ***Allowable Subject Matter***

3. Claims 1-14 are allowed.
4. The following is an examiner's statement of reasons for allowance:
5. The prior art of record fails to disclose a method and system for enabling efficient utilization of overlapping adjacent channels comprising a receiver for receiving a waveform

Art Unit: 2611

having data and noise information, a filter bank for filtering the waveform and outputting channel information and estimated data signals, and for calculating estimated interference signals corresponding to the channel information, and one or more interference generating processors for receiving the estimated interference signals and generating interference signals therefrom, where the interference signals generated by the interference generating processor are subtracted from the estimated data signals in order to provide more accurate estimated data signals. Shimizu et al. U.S. Patent 6,496,534 is considered to provide estimated interference information from channel information, but does not disclose an interference generating processor that generates a new set of interference signals from the estimated interference signals, and subtracts the thus generated interference signals from the estimated data signals.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***
